About TiSento

TiSento literally means 'I feel you' and is a gift from the heart. TiSento allows you to let your feelings speak. Every moment is a TiSento moment!

The beginning

TiSento

The trendy plant label TiSento Feelings of Flowers was created in 2006. It blossomed from a grower's passionate belief that "everyone should experience the special and happy feeling created by flowering plants." Flowers say more than words, they are a gift from the heart. As symbols of our personal message, they have a magical effect. TiSento means 'I feel you' and represents the special sentiment and significance associated with giving or receiving plants and flowers – especially that special feeling of happiness, warmth and love. This is what TiSento is all about:

letting your feelings speak and enjoying the experience.

Surprising and trendy

Our TiSento collection is available in many vibrant colours and can be recognised from its trendy gift packaging. We draw our inspiration from the newest fashion and styling trends and work this into our packaging and colour combinations, which are tailored to the changing seasons. As a result TiSento always has a surprise up its sleeve, allowing you to create just the right feeling and mood in your home every season and every special event.

Organisation

TiSento

The TiSento organisation has its own modern nurseries where we grow Calandiva and TiSento pot amaryllis. For other products, we work closely with specially selected and certified TiSento growers. This enables us to offer a varied assortment for every season, making TiSento a perfect Service Platform for customers where we control all aspects of the supply chain. Our enthusiastic sales team is happy to advise you about the right product combinations and packaging to ensure that your shop looks cheerful and attractive all year round. Our own distinctive lorries transport our products to auctions and customers. We are driven by a desire for continuous improvement: TiSento therefore uses a highly sophisticated logistics-based plant management system and its greenhouses have all the latest equipment, enabling TiSento to deliver exactly what its customers want.

TiSento, specially for you!
